

HOTFIL 2

FICHE TECHNIQUE

HOTFIL2 is a manual apparatus intended for the hot cut of the braids **Gremflex®** made up of thermoplastic monofilaments (PET, PA, PP...). This apparatus is installed on a table and allows you to work easily with the two hands.

These robust tools will enable you to carry out the small ones or average series.

Capacity of cut	All the diameters of the Gremflex® range (Ø3 up to 50mm).
------------------------	--

Working length of the wire of cut	100mm.
--	--------

Type de materials	All thermoplastic types of monofilaments (PET, PA, PP...)
--------------------------	---

Tension	230 / 6V
----------------	----------

Time of heating	Instantaneous
------------------------	---------------

Cutting temperature	+800°C
----------------------------	--------

Dimensions - Weight	Length: 18cm x Width: 9,7cm x Height: 11,5cm - 1,4Kg
----------------------------	--

TECHNICAL CHARACTERISTICS :

The apparatus comprises a transformer in conformity with Standard IEC 65, with a tension of behaviour of 4 kV, power 20 GOES, typical regulation 7.5%, tension of 6V use. The electric cable disconnected is in conformity with the European standards. The apparatus is delivered with a sachet of 10 wire of replacement. Ref: HOTFIL2. The replacement wires are sold by sachet of 10 wires separately. Ref: FILS2.
